Infrared inspection with a FLIR thermographic camera enables a powerful noninvasive method to monitor and diagnose the condition of buildings.

The inspector can quickly identify problem areas that can't be seen by the naked eye, eliminating destructive probing methods. Results are captured and documented into professional reports and provide tangible proof of the inspector's findings.

Ian S. Laing of First Resort Residential and Commercial Inspection Services is a Certified Level I Infrared Thermographer and Certified Building Science Thermographer (CBST) with FLIR Systems. First Resort offers a unique value added service to residential and commercial clients.
